New Product offering

SCAV Now Offers Digital Signage

SCAV continues to search for new products to bring to you in order to enhance your meeting or event.

We are now offering Digital Signs as part of our services. Our product includes all the hardware presented in an attractive package to provide you with current information during your event. We take your PowerPoint slides, PDF or Jpeg files and wireless transmit them to each sign for display. Each display can be addressed individually or as a group to have different content or the same content running at the same time. They can be designed vertically or horizontally.

We can also schedule the content to change as your event changes such as room schedules, or different information tailored to different sessions.

Our signs can also be programmed to display a ticker in case of an emergency or if you just want to get information out quickly.

So pack up those old easels with cardboard signs and store them with the overhead projectors and move into the digital age with vibrant graphics displaying current and evolving information. Ask us about Digital signs for your next event.
