## SCAV Employees Receive Scissor Lift Certifications.

I think most all of us have seen recent news involving industry related accidents and far too many of them. In an effort to strengthen our safety practices and comply with more venues' requests, SCAV has completed a certification course for scissor and aerial lifts.

Each employee who works on a lift has a card in their possession to present when required. A certificate can also be presented to the venue when requested for their files.

Safety cannot be under estimated in the workplace especially when you are working 30+ feet off the floor. Our company policy states that all employees and vendors must wear fall restraint devices while working off the floor. This not only protects the employees but the venues as well.

While this alone will not prevent an accident, it will certainly educate the employees as to correct practices and incorrect practices.

SCAV is committed to safety on the job in all aspects. We take it extremely seriously.
