

## Denon 720R Specs

### Product Description

- 19-inch rack-mountable.
- Amorphous Head - The advantage of the amorphous head is that it improves the high frequency dynamic range by as much as 2 to 2.5db at 14kHz.
- Dolby HX Pro Headroom extension system.
- Tape speed control of +/- 12%.
- When switched to the variable speed mode, a rotary knob allows speed change of plus or minus 12%.
- Musicians can change the key of a song during playback and DJs can change the tempo of dance songs for beat mixing.
- The center click position is normal speed.
- When the "Tape Speed" button is pressed, normal speed is provided regardless of the knob position.
- Memory Rewind (Return-to-Zero) - Once you search a cue point, press the memory button and reset the tape counter, the player stops at zero if you rewind the tape.
- FL Peak Hold Level Meter.
- Non-slip Reel Drive - The highly reliable friction reel drive produces optimum tape tension during fast forward and rewind, as well as stable tape travel during playback and recording.
- Precision Music Search.
- Auto Tape Selector (Normal/CrO2/Metal).
- Precision tape counter (Real Time Tape Counter).
- Optional Wired Remote Control (RC-700).
- Bias Fine Adjust 0 Separate bias fine-adjustment knobs for the left and right channels are provided on the front panel for convenient fine tuning of recording bias level, for flattest response with virtually any tape type.
- MPX Filter for FM stereo recording.
- Tape length selector for precision counter display.
